

The smart tool for every situation

Our Nidec Servo Selection Tool has been relaunched. Find the right gearbox for your application with just a few clicks!

In the field of drive technology, optimally dimensioned products are required for the successful use of a wide range of systems. To be able to fulfil these requirements, calculations, dimensional drawings and CAD data are essential. The Nidec Servo Selection Tool answers your questions in seconds and finds the right gearbox for you.

Your benefits:

- Efficient online sizing in a matter of seconds
- Automatic comparison of the motor and gearbox geometry
- Variety of variants and options available
- Dimension drawing and CAD data with a single click
- User friendly comparison function
- No need to log in
